TECHNICAL SPECIFICATIONS

COMPOSTABLE TUBESAC LINERS

40 & 90m

FEATURES

- Continuous waste bins help to deliver a neat and environmentally responsible solution for everyday waste disposal.
- With the continuous liner system, bags are measured by length rather than litreage as bags can be cut at a suitable length for your required use.
- These bags will break down naturally under composting conditions.
- Ideal choice for businesses and facilities focused on sustainability.
- Due to the biodegradable nature of these products, they only have a 12-month shelf life so should be used as soon as possible and stored accordingly.

SPECIFICATIONS

- 40m or 90m length cassette available
- Compostable
- EN13432 Certified
